

NEW RELEASE!

Marlborough, MA Dec 31, 2015

ACUTA ARIM v2.3.2 is now available.

The latest release of ARIM is now available!

Attached, please find the ARIM v2.3.2 Release Notes for a complete listing of the issues addressed and new features/enhancements included in this release. Some of the new key features include:

New Features/Functionalities

- Support for GCC eCTD and NeeS specifications
- Support for Swiss Medic eCTD v1.3 specification
- Create and Manage eCTD Templates
- Copy paste Section or Module for Templates
- Document Status Filter for NeeS
- Application level Notifications filtered on status
- A user can now choose the Submission Mode as “single” or “grouping” for a Submission Type of “supplemental information” and for a variation.
- Per FDA guidelines, the 'listing' folder has been renamed to 'misc'.
- A user can now toggle Document Status between the three Authoring status types without having a document assigned for a placeholder leaf.
- When a user performs a drag and drop operation with a document, the system will now validate for the file length immediately at the selection
- A user can now create multiple Commitments from a Correspondence with 'About' selections determined by the Correspondence topics.
- A user can now export Applications in Admin Manage Applications.
- And many more...
